Instantly create a
SAFE ZONE
within your building
during a crisis

The ANCHOR

by Anchorman Inc.

Patent No. 61811218

Over 50,000 sold

How it works

- **The Anchor** is installed by Anchorman Inc. endorsed professionals
- Each door then can become an impenetrable barrier
- Simply engage the barrier with your toe, to quickly create a SAFE ZONE
- First responders are provided a tool to disengage **the Anchor** to reach rescue sites
- Once the threat subsides you can easily release the Anchor to allow you to exit through the door as normal

The STORY of the ANCHOR

The Co-founders of Anchorman Inc. are Tom Giandomenico and Jeff Coates, two decorated SWAT trainers and tactical officers from Los Angeles.

During a raid on a well known outlaw biker gang's safehouse they were unable to breach the door. After many failed attempts and once the warrants were served, they noticed a device installed by the bikers to prevent entry. An idea was born and this was the precursor to the ANCHOR we have today. The patented "**SAFE ZONE creation device**" has gone through many design improvements and has come to be recognized as the finest tool of it's kind among top security professionals.

"The ANCHOR by Anchorman Inc. is the BEST safe zone creation device on the market – bar none!"

Here's WHY...

- Easy and Intuitive
- Door remains CLOSED
- Gross motor skills – only
- First responder friendly
- Reliable
- Machined using aerospace technologies
- Analog
- Durable & Destruction proof
- You remain undetected
- Designed by SWAT pros

Instantly create a SAFE ZONE during a crisis
